

## GETTING TO ZERO COALITION

# Application form for joining the Getting to Zero Coalition

Joining the Getting to Zero is an expression of intent that does not create any legal or financial obligations. To become a member of the Coalition a company or organization must adhere to the ambition and core principles of the Coalition, both stated in the Ambition Statement [here](#).

If you would like to join the Getting to Zero Coalition, please apply by completing this application form. Answers to the questions are not binding in any way and simply aim to support the decision-making process.

Many organizations are interested in joining the Getting to Zero Coalition. Therefore, and in order to ensure that the Coalition is one of action and not only of ambition, a few selection criteria will be applied when assessing the application.

Among the criteria for evaluation are:

- **Motivation:** the motivation expressed by the applicant for wanting to join the Getting to Zero Coalition
- **Ability:** that the applicant can show that it can meaningfully contribute in meeting the ambition of Getting to Zero Coalition. This will exclude for example companies only favoring efficiency solutions<sup>1</sup> or fuels that don't meet the criteria defined by the Coalition. Read more [here](#).
- **Size:** companies that are big enough to be able to make a real impact both through their actions and by putting their weight behind the initiative will be prioritized.
- **Segment** in the value chain and geography: the Coalition strives to have a global reach and to include actors across the value chain in different regions. Segments or regions not yet well-represented will be favored.

While the criteria guide the application process, each application is evaluated on its own merits.

Applications are reviewed in batches and you can expect an answer from us within three weeks of your request.

Contact details of the person applying on behalf of the organization	
Full name	
Position	
Email address	

---

<sup>1</sup> The Getting to Zero Coalition strongly supports organizations that are working towards energy efficiency measures within the shipping industry. However, this is not the focus of the Getting to Zero Coalition and applicants solely focusing on efficiency technologies do not fall under the scope of the Coalition.

**Background information on the organization**

Organization name	
Mailing country of the headquarter	
Number of employees	
Name the countries in which you have offices/operations or insert link showing this
